HÉRITAGE RANGE

Packs

MERCEDES CHASSIS **PACK**

£3 960 - INCL. TAX

- 16" alloy rims - 6 spoke - black finish (all-season tyres)
- Additional water heater (engine and cab)
- Two additional keys
- Smartphone holder and wireless charger in the centre storage compartmentl
- DISTRONIC PLUS adaptive cruise control system
- Leather steering wheel

LIGHT ENERGY LITHIUM **PACK**

£6 080 - INCL. TAX

- 300 Ah lithium battery
- 210 W TOPCon monocrystalline high performance solar panels
- 3000 W converter Pur Sinus/By-pass

FULL ENERGY LITHIUM **PACK**

£10 480 - INCL. TAX

- 300 Ah lithium battery
- Second 300 Ah lithium battery and 40 A charger
- 210 W TOPCon monocrystalline high performance solar panels
- Second 210 W monocrystalline TOPCon solar panel
- 3000 W converter Pur Sinus/By-pass

LUXURY HÉRITAGE **PACK**

£33 440 - INCL. TAX

- 16" alloy rims - 6 spoke - black finish (all-season tyres)
- Additional water heater (engine and cab)
- Two additional keys
- Leather steering wheel
- Alde® Diesel / 230 V boiler
- Heat exchanger for Alde® living area heating (requires additional heater)
- Smartphone holder and wireless charger in the centre storage compartment
- DISTRONIC PLUS adaptive cruise control system
- Leather bench seats and front seats (Prestige Satin, Vison or Alezan)
- High furniture doors with high gloss white finish
- Double speakers in the bedroom
- Electric longwise drop-down bed with drawer and ladder, fall prevention net, storage table, 12 V and USB sockets
- Toilet with removable cassette on castors (17 L capacity)
- Toilet cassette ventilation - SOG II
- Second WC cassette
- Clothes line in the shower
- Electric waste water drain valve controlled from the driver's position and with camera
- Electrically-stored island bed or twin beds with electric push-together system (incompatible with bed insert)
- 300 Ah lithium battery
- Second 300 Ah lithium battery and 40 A charger
- 3000 W converter Pur Sinus/By-pass
- 230 V extension cord reel
- Water hose reel with Gardena connector (8 metres)
- UV filtration and disinfection system
- 210 W TOPCon monocrystalline high performance solar panels
- Second 210 W monocrystalline TOPCon solar panel
- Third 210 W monocrystalline TOPCon solar panel
- Drowsiness alarm
- Outside 12 V electric awning
- LED strip on the outside awning
- Coffee machine (not available for LVXH 7.9 GJL)
- Passenger's side sliding drawer in the forward hold
- Driver's side sliding drawer in the forward hold (not available for LVXH 7.9 GJL)

LUXURY HERITAGE LVXH 7.6 **PACK**

£32 560 - INCL. TAX

- 16" alloy rims - 6 spoke - black finish (all-season tyres)
- Additional water heater (engine and cab
- Two additional keys
- Leather steering wheel

LEGAL NOTICE:
Pilote Group, route du Demi-bœuf, 44310 La Limouzinière, France
SARL with equity of €20 000 000, entered on the Nantes company & trade register under no. B872 802 780.
Siren: 872,502,780

REMARKS:

This brochure shows the information known at the time of printing. It does not constitute a binding document under any circumstances. Despite the care taken in preparing this document, printing errors may still occur. We reserve the right to modify fittings and improve products in the current year's models without prior notice. The available payload is the difference between the Maximum Technically Permissible Laden Mass (MTPLM) and the Mass in Running Order (MRO). The MTPLM and MRO include the vehicle and its bodywork, furniture, standard fittings, 90% full fuel tank, one 13 kg gas bottle (except LV 7.0 GJF: one 10 kg composite gas bottle) and 1 litre of fresh wate, empty wastewater tank and 75 kg driver weight. The capacity of the fresh water tank, determined for the calculation of the mass in running order, is 1 litre. This is in line with the regulations and in particular the number of road seats defined at the time of approval. It is the user's responsibility to adapt his load and the number of people on board according to the payload of his vehicle, in compliance with the maximum technically permissible total and axle weights. If necessary, the user can choose to limit his load or the number of people carried in order to increase his clean water capacity above this value. The maximum clean water capacity is that defined for each vehicle in the 'Autonomy' paragraph.

Translated with DeepL.com (free version) Ensure that the maximum weight permitted is never exceeded (total and per axle). Important: Installed optional fittings and accessories are not included in the vehicle's MRO. Consequently, they will systematically reduce the available payload and potentially reduce the number of driving seats. Contact your dealer, who will be happy to provide you with an accurate definition of the models available in each country. Before submitting your order, please contact a dealer for information about the current product and collection status. Information about the vehicle's delivery, appearance, performance, dimensions and mass correspond to the information known at the time of printing. Those details and tolerances comply with European regulations (UE 1230/2012), however they are subject to change up until the time of vehicle purchase or delivery.

The manufacturer is committed to delivering a vehicle whose actual MRO sits within the factory tolerance threshold of plus or minus 5% of the value set during the certification process. The maximum tow weight is a chassis limit related to the vehicle's certification. Depending on the coupling attached to the vehicle and the specific values stated by the coupling manufacturer, the maximum weight that the vehicle can tow on the trailer may be lower. The coupling resistance specifications (in particular values D and S) are engraved on a plate attached to it. The D value helps determine the MTPLM for towing using the following calculation: MR = DxT/[(9.8xT)-D], where: MR = maximum possible mass of the trailer (tonnes); T = Maximum Authorised Mass (MAM) of the vehicle (tonnes); D = value (kN) shown on the coupling. Example: if D = 11.3 kN and T = 3.5 T, the maximum trailer mass (MR) would be: MR = (11.3 x 3.5)/[(9.8 x 3.5) - 11.3] = 1.72 T (or 1,720 kg). Giving the vehicle's maximum towing mass (up to 2.5 T).
